CO1 - AT2

Course Code : CSA5112

Course name : Cryptography and network Security

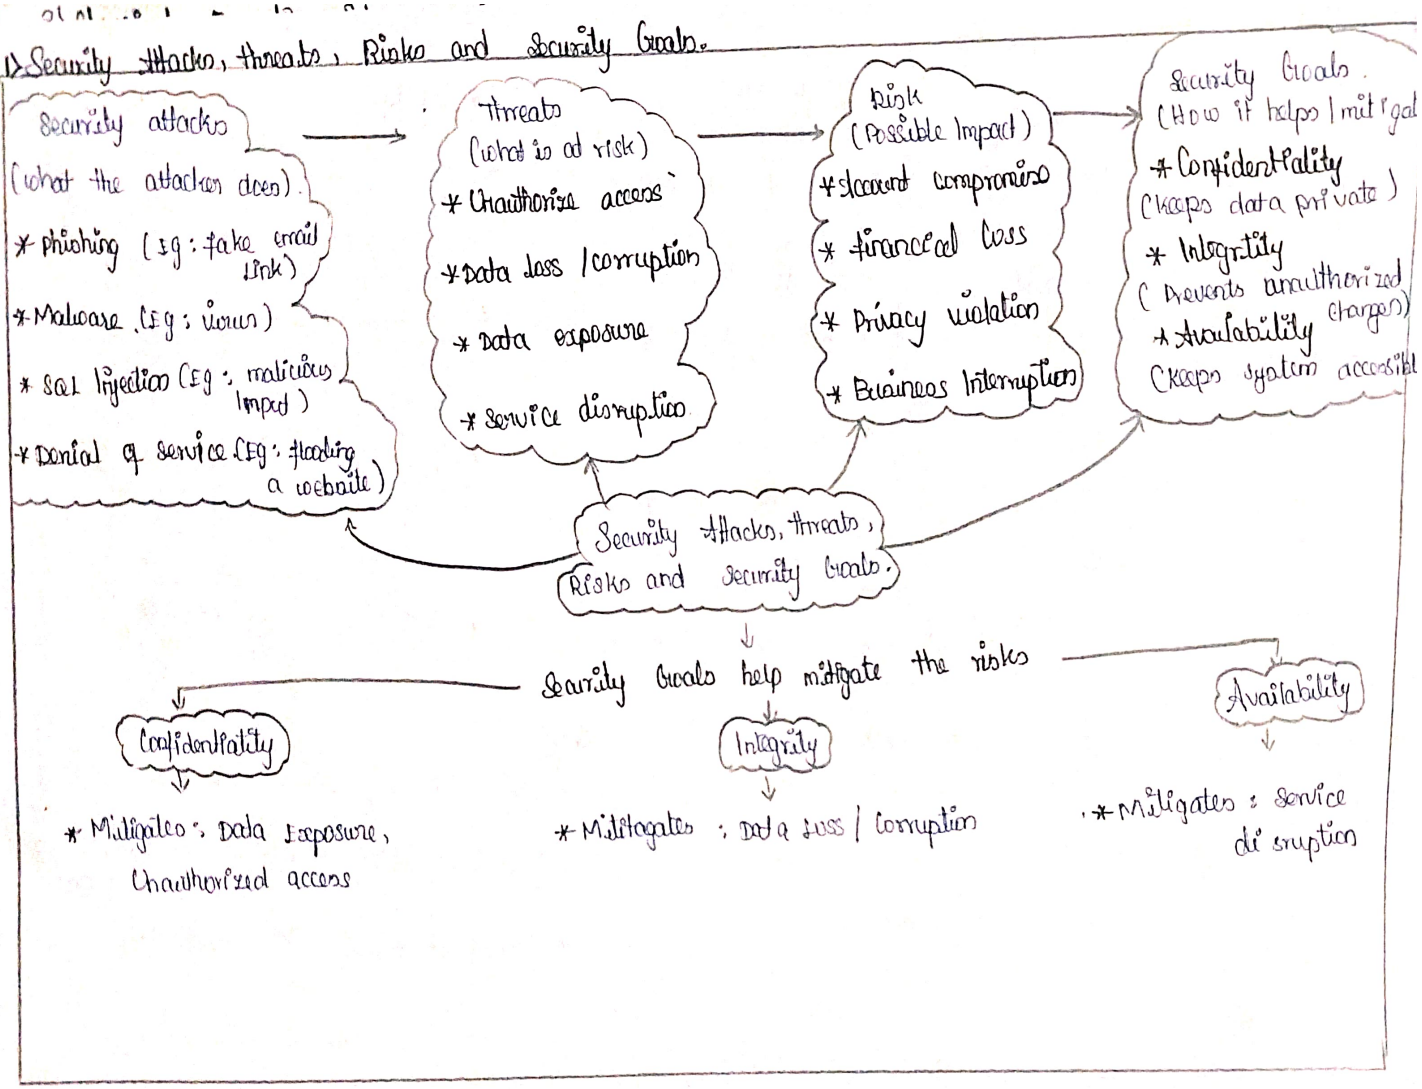

Guided by. : Sivashankar Chandrasekar.

Name : S. Reshma

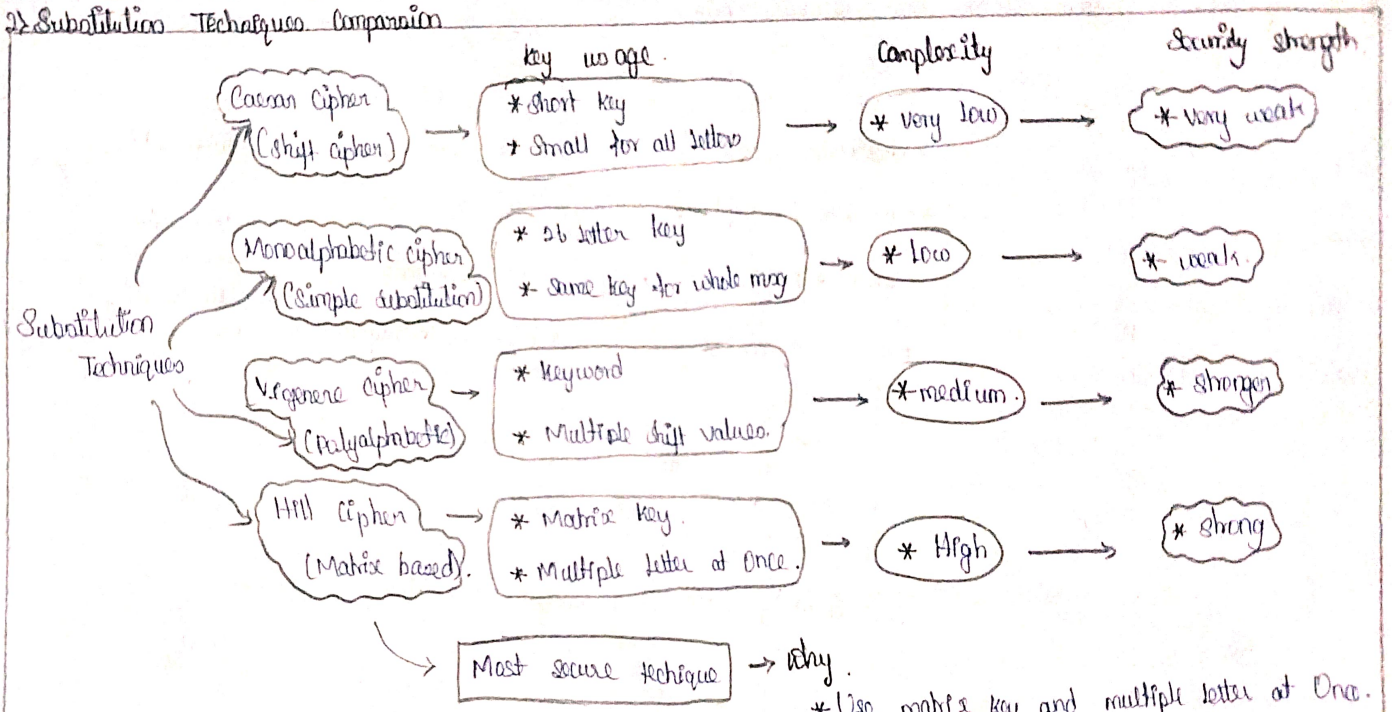

Reg. No : 192421229.

Date : 15/10/2024.

1) Security Attacks, threats, Risks and Security Goals.

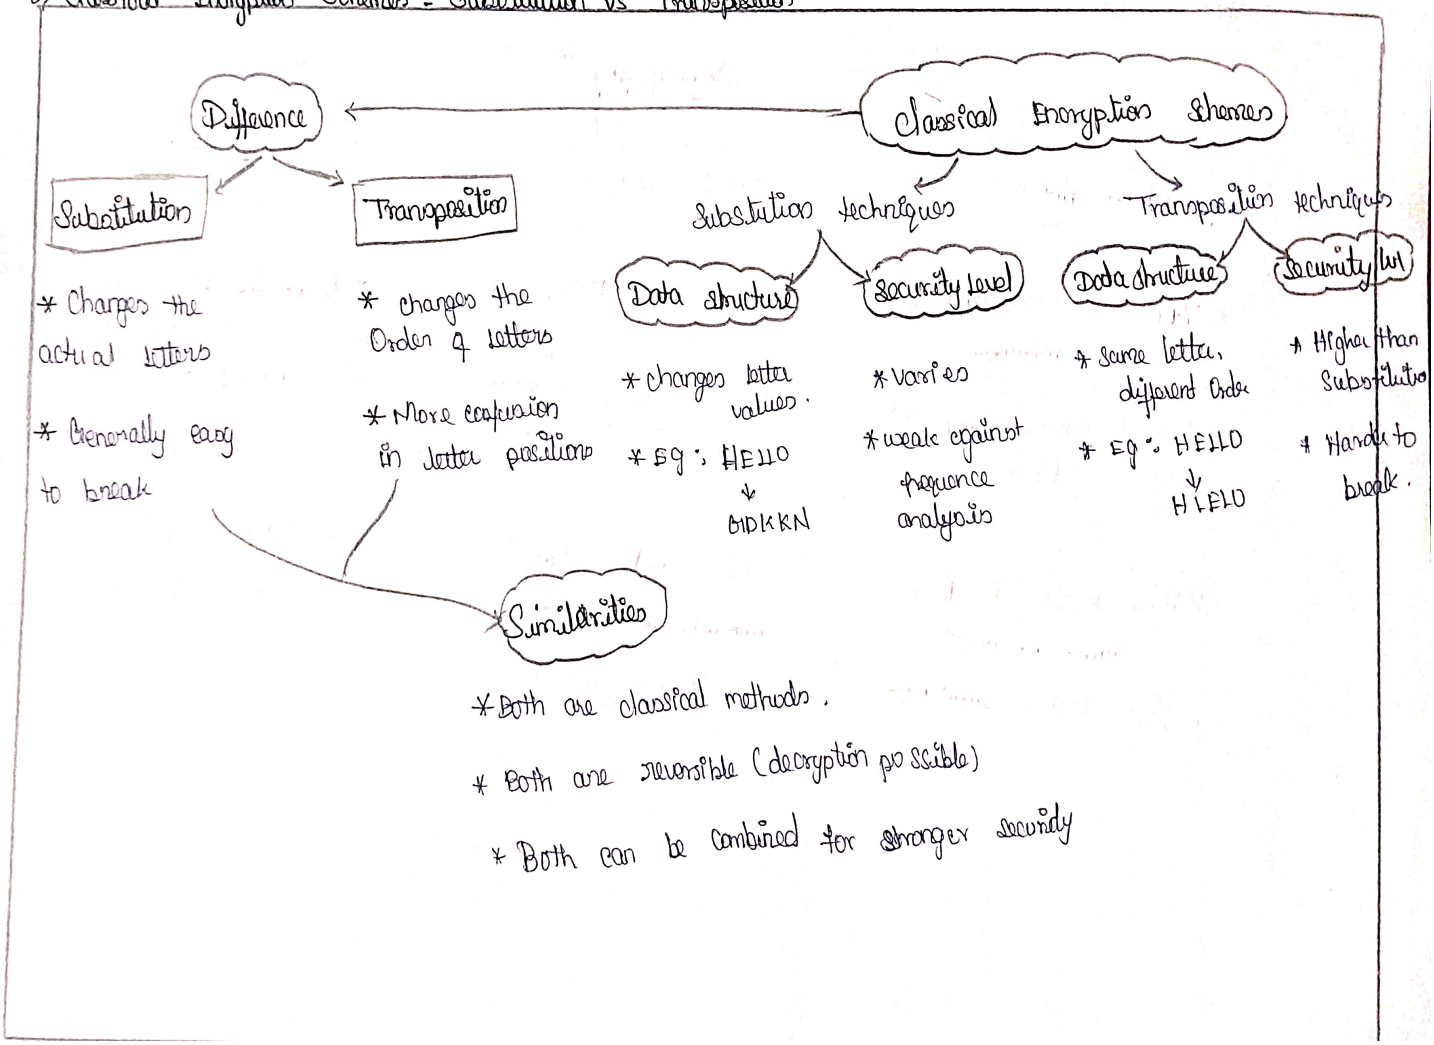

2) Substitution Techniques Comparison

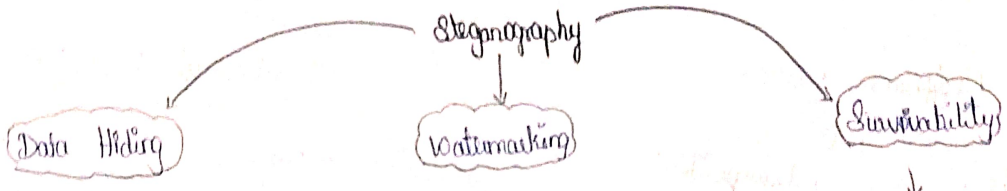

* Use matrix key and multiple letter at Once.
* Creates complex patterns in ciphertext.
* Harder to break with simple analysis methods.

3) Classical Encryption Schemes - Substitution vs Transposition

Steganography Concept

- Data Hiding
  - * Hides the existence of the message.
  - * Prevents eavesdropping and detection
  - RTA : Hiding message in image, video or audio
  - Eg : LSB in image files
- watermarking
  - * Protects authenticity and ownership
  - * Helps in tamper detection
  - * Digital watermarking in photos, video or documents
  - Eg : copyright production
- Survivability
  - * Keeps the hidden data / watermark intact even after attack, Compression or noise
  - * Robust watermarking in media field.
